QUICK START GUIDE

THIS GUIDE RELATES TO THE FOLLOWING STYLESHEETS:

PRODUCT: OS MASTERMAP® GREENSPACE LAYER

DATA FORMAT: SHP

STYLESHEET FORMAT: ESRI LAYER FILES (LYR)

The stylesheets have been designed to work with the data as supplied.
1   Either fork the stylesheets on GitHub or download them and navigate to the directory that matches your data format, stylesheet format and style preference.

2   Open a new, blank map in ArcMap.

3   Right-click on 'Layers' at the top of the Table Of Contents, select Properties… > then under the Coordinate System tab > choose British National Grid. You may need to reposition to the data extent.

4   Click on the 'Add Data' button and navigate to the stylesheets folder and the directory that matches your data format, stylesheet format and style preference.

5   Select the layer file and click 'Add'.

6   Double-click on a layer to access the 'Layer Properties' window > select the 'Source tab' > click on 'Set Data Source…' > navigate to your OS MasterMap Greenspace data > select the GreenspaceArea data > select 'Add'

Repeat step 6 for all layers if they don't link automatically.

Scale thresholds have been set to allow viewing of the data between1:250 and 1:10 000 for maximum legibility.

We recommend viewing the data with OS MasterMap Topography Layer in either Backdrop, Outdoor or Light styles.

Your data should now look similar to this:

There is a folder entitled 'alternative-styles' with slightly modified stylesheets (LYR files) better suited to traditional 'green' style Topography Layer and Imagery Layer.

Compatibility notes

Our Layer Files are compatible with versions of ESRI ArcGIS back to version 9.3 (released in 2008).
